

# Turnkey sodium ion battery storage EPC contract price in Chile

## Overview

---

How many EPC agreements has Metlen signed in 2025?

Specifically, METLEN has signed and executed in the beginning of 2025 3 individual EPC agreements that encompass the implementation of a total 190,5MWp of Solar energy capacity and more than 2,500MWh of Battery Energy Storage System (BESS) capacity. All projects are set to be delivered no later than Q1 2026.

What will e-storage do under the EPC contract?

Under the EPC contract, e-STORAGE will manage all civil, mechanical, and electrical infrastructure for the project. Toshinori Kawahara, General Manager of ASC4, commented: “Building our energy storage project is a major milestone for ASC4. We are very pleased to be able to contribute to a stable supply of electricity in northern Chile.”.

Can co-located batteries help solar plants capture better power prices?

Co-located batteries, like Engie S.A.’s BESS Coya, will help solar plants capture better power prices by charging the batteries during solar hours when power prices are very low and dispatching energy during peak hours when prices are close to USD 100/MWh.
