

Warehouse solar storage cost breakdown in Canada 2026

Overview

How much energy storage is needed for a net-zero transition?

A recent white paper published by Energy Storage Canada, the nation's leading industry organisation for all things energy storage, concluded that anywhere between 8,000 MW to 12,000 MW of energy storage potential would optimally support the net-zero transition of the Canadian electricity supply mix by 2035.

What is the average floor area of a warehouse in Canada?

The average gross floor area is 13,900 m², and the median is 8,900 m².
Table 2. Characteristics of warehouses – range of values
The buildings in this table represent 4% of the floor area and 4% of buildings registered in Portfolio Manager in Canada. Figure 4. ENERGY STAR score range.

What is the average Eui for a warehouse?

The median source EUI is 0.9 GJ/m² Figure 3. Distribution of floor area and buildings
This diagram shows that larger buildings represent a relatively small portion of the number of buildings but account for over half of the floor area benchmarked for warehouses in Portfolio Manager.
