

Warehouse solar storage cost vs benefit calculation in Saudi Arabia

Overview

How much does a solar PV project cost in Saudi Arabia?

In Saudi Arabia, each of the two awarded rounds of the Renewable Energy Project Development Office (REPDO) auctions, totaling 2.17 GW, in addition to the PIF-led projects, has received record-low prices. The 300 MW Sakkaka solar PV project, the first project under REPDO, set a record tariff of 1.34 USD cents/kWh in February 2018.

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage (batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

Which countries are setting record low tariffs for solar energy projects?

Saudi Arabia and the UAE have been setting record low tariffs for solar energy projects. In Saudi Arabia, each of the two awarded rounds of the Renewable Energy Project Development Office (REPDO) auctions, totaling 2.17 GW, in addition to the PIF-led projects, has received record-low prices.

How should energy storage be regulated?

Adopt a comprehensive regulatory framework with specific energy storage targets in national energy policies by setting achievable targets and timelines to drive energy storage deployment. Energy and electricity laws and regulations should account for the deployment of energy storage and be amended accordingly.

Should ESS be used in a solar auction?

Although some auctions are focused on ESS or solar plus storage, deployment targets emphasize only renewable energy generation and do not account for energy storage systems. Moreover, some regulations may be unfavorable to

the deployment of ESS, such as the net-metering scheme on a flat tarif.

What is energy storage system deployment in MENA?

Energy Storage System deployment in MENA Energy Storage Systems (ESS) play a critical role in the integration of VRE into the power grid, as these systems manage the intermittencies of renewable energy resources and mitigate potential power supply disruptions.
