With years of industry experience, we provide a trustworthy and seamless service for selling used electrical equipment. RESA Power understands the importance of recycling, that's why we purchase surplus, used, and obsolete electrical equipment, whether it's a single item or an entire warehouse.

How do you sell electricity to the grid?

One way to legally sell electricity to the grid is to register as a generator, obtain an electricity-generating license, and begin producing power. There are several ways that license generators can make power and earn income: These projects take many years of local, state, and federal approval and can cost upwards of billions of dollars.

Can I sell power to the grid without a generator?

As we stated previously, you cannot sell power to the grid without being a registered generator. You can, however, receive billing credits for excess

power from a solar system or wind turbine. Read on to learn about the different ways to sell back power. This is the most common way consumers believe they can sell electricity to the grid.

How much money can you earn from selling electricity?

The amount of money you can earn from selling electricity depends on your place in the market. Registered electricity generation plants earn wholesale electricity prices for their power, while consumers can earn retail credits. Let's look at each in more detail.
