The Necessity and Feasibility of Hydrogen Storage for Large ...

In the process of building a new power system with new energy sources as the mainstay, wind power and photovoltaic energy enter the multiplication stage with randomness and uncertainty, ...

Tiejiang Yuan

Sinks and sources are constructed, utilizing the frequency domain characteristics of net load and energy storage, respectively. A planning method of power system source and storage based ...

????????????????????

The pilot application of electrochemical energy storage in power system has gained a lot of experience, which lays a good foundation for the next large-scale application. Key words: new ...

Energetic macroscopic representation control method for a hybrid ...

This paper proposes a new control method for a hybrid energy system. A wind turbine, a hydrogen energy storage system, and a proton exchange membrane fuel cell are ...

Tiejiang Yuan's research works , Dalian University of Technology

This paper presents a doubly fed induction generator (DFIG) wind power system with hydrogen energy storage, with a focus on its virtual inertia adaptive control.

Tiejiang Yuan, Jinjun Wang, Yuhang Guan, Zheng Liu, Xinfu ...

This paper presents a doubly fed induction generator (DFIG) wind power system with hydrogen energy storage, with a focus on its virtual inertia adaptive control. Conventionally, a ...

Battery Energy Storage Selection Based on a Novel Intermittent ...

Owing to intermittency of wind power and slow ramp rates of conventional generators, a considerable amount of wind energy cannot be effectively utilized during ...
